EDUCATION

Indian Institute of Information Technology, Nagpur

Aug 2023 – May 2027

B.Tech, Computer Science and Engineering | CGPA: 7.4/10

Relevant Coursework: Data Structures & Algorithms, Full-Stack Web Development, Object-Oriented Programming, Database Management Systems, RESTful API Design, Operating Systems, Computer Networks.

PROJECTS

Movie Recommendation Engine – ML-Powered Web Application

[Live](#) | [GitHub](#)

Tech: React.js, JavaScript, Machine Learning, NLP, Cosine Similarity, REST APIs

- Built universal live autocomplete with instant title matching and highlighted search characters.
- Developed a content-based ML recommender using cosine similarity to generate 10 relevant movie suggestions.
- Implemented NLP sentiment analysis classifying reviews as Positive/Critical with confidence scores.
- Integrated YouTube trailers and direct streaming links across Netflix, Prime, Disney+, Apple TV, JioCinema.

AI Interview Platform – Conversational AI Web Application

[Live](#) | [GitHub](#)

Tech: React.js, Gemini API, Web Speech API, NLP/NLU, PDF Parsing

- Architected a zero-cost AI interview platform using only the free Gemini API, no paid services.
- Parsed candidate resumes and enriched profiles with live GitHub, LeetCode, and Codeforces stats.
- Built a Gemini-powered adaptive NLU engine conducting multi-turn technical interviews with intent recognition.
- Designed a real-time voice-call UI with live captions and automated performance evaluation reports.

Celebrity Face Lookalike – Deep Learning Web Application

[Live](#) | [GitHub](#)

Tech: Python, Deep Learning, Computer Vision, MTCNN, VGGFace, ResNet50

- Built a face-matching app identifying celebrity lookalikes from uploaded images using deep learning.
- Performed face detection and alignment using MTCNN for accurate facial localization.
- Extracted deep facial embeddings using a ResNet50-based VGGFace model for feature representation.
- Computed real-time similarity scores via cosine similarity with a responsive React interface.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend & Web: React.js, Next.js, TailwindCSS, WebSockets

AI/ML: Machine Learning, Deep Learning, TensorFlow, PyTorch, NLP, NLU, Generative AI, Gemini API, LangChain

Computer Vision: MTCNN, VGGFace, ResNet50, Facial Embeddings, Cosine Similarity

Databases & APIs: PostgreSQL, MongoDB, Redis, MySQL, REST APIs, GitHub API

DevOps & Infrastructure: Docker, Linux, CI/CD, Vercel, Render

ACHIEVEMENTS

- Ranked **125th globally** out of **41,000+ participants** in CodeChef Starters 227; attained global rank **283** and All India rank 67 among **35,000+ participants** in LeetCode Biweekly Contest 180.
- Reached Guardian tier (**2100+ rating**) on LeetCode and **4-Star** (1800+ rating) on CodeChef; earned 3-Star C++ and 4-Star DSA badges on HackerRank; solved **1200+ problems** across all platforms.
- Selected as **National Hackathon Finalist** at the competition hosted by IIT Guwahati, competing against teams from top engineering institutions across India.
- Selected as **Finalist** at the hackathon organized by **IIIT Gwalior**, competing against student teams from premier technical institutes across the country.
